

- The electrochemical heated-diode sensor resists dirt, water, oil, and other contaminants offering exceptional resistance to the effects of contamination.
- Equal sensitivity to R12, R134a , HCFCs, and HFCs eliminates resetting or switching for different refrigerants.
- Variable-intensity audible signal and single flashing LED to help pinpoint leaks.
- Automatic adjustment ( zeroing) to refrigerant in leak test area.
- Rugged flexible probe with foam filter for sensor protection.
- High/Low leak-sensitivity & ON / OFF in one switch.
- Powered by two "D" size alkaline batteries.

**The affordable portable AC Leak Detector with proven Heated-Diode Sensor Technology**
